Even if you don’t want to eat your veggies…

**You should still eat green!**

**Tips for “green” dining**

- Don’t use takeout. Even though UVA Dining got awesome biodegradable containers this year, they are still another bit of waste you don’t need to produce.

- If you must use takeout, use your own silverware and drinks back at your room.

- Look at all of the food before you pick out what you want: only get food that you know you will eat!

  - Start with smaller portions. If you want more you can go back, but if you get too much you’re wasting!

And the easiest and most effective tip:

**Don’t use trays!**

*One-third of the water used in dining halls* *is used on washing trays!*
